

Priorities & Metrics Workgroup Revisions to the Vision, Mission, Goals, Objectives, and Targets

Vision:

An integrated, balanced, and consensus-based approach to ensuring the long-term sustainability of ~~San Diego's~~ the Region's water supply, water quality, and natural resources.

Mission:

To develop and implement an integrated strategy to guide the Region toward protecting, managing, and developing reliable and sustainable water resources. Through a stakeholder-driven and adaptive process, the Region can develop solutions to water-related issues and conflicts that are economically and environmentally preferable, and that provide equitable resource protection for the entire Region.

Goals:

1. ~~Optimize water supply~~ Improve the reliability and sustainability of regional water supplies.
2. Protect and enhance water quality.
3. ~~Provide stewardship of~~ Protect and enhance our watersheds and natural resources.
4. ~~Coordinate and integrate~~ Promote and support integrated water resource management.

Objectives, Targets, and Metrics:

To be included in the San Diego IRWM Plan, all implementation projects must contribute to the attainment of Objective A, Objective B, and at least one other objective.

Objective A: Encourage the development of integrated solutions to address water management issues and conflicts.

Objective AB: Maximize stakeholder/community involvement and stewardship of water resources, emphasizing education and outreach.

Objective BC: Effectively obtain, manage, and assess water resource data and information.

Objective CD: Further scientific and technical foundation of water management.

Objective DE: Develop and maintain a diverse mix of water resources, encouraging their efficient use and development of local water supplies.

Objective EF: Construct, operate, and maintain a reliable infrastructure system.

Objective FG: Enhance natural hydrologic processes to reduce the effects of hydromodification and encourage integrated flood management~~Reduce the negative effects on waterways and watershed health caused by hydromodification and flooding.~~

Objective GH: Effectively reduce sources of pollutants and environmental stressors to protect and enhance human health and safety and the environment.

Objective HI: Protect, restore, and maintain habitat and open space.

Objective IJ: Optimize water-based recreational opportunities.

Objective JK: Effectively address climate change through adaptation or mitigation in water resource management.
