

Priorities & Metrics Workgroup Revisions to the Vision, Mission, Goals, Objectives, and Targets

Vision:

An integrated, balanced, and consensus<u>-based</u> approach to ensuring the long-term sustainability of San Diego's-the Region's water supply, water quality, and natural resources.

Mission:

To develop and implement an integrated strategy to guide the Region toward protecting, managing, and developing reliable and sustainable water resources. Through a stakeholder-driven and adaptive process, the Region can develop solutions to water-related issues and conflicts that are economically and environmentally preferable, and that provide equitable resource protection for the entire Region.

<u>Goals:</u>

- 1. Optimize water supply Improve the reliability and sustainability of regional water supplies.
- 2. Protect and enhance water quality.
- 3. Provide stewardship of Protect and enhance our watersheds and natural resources.
- 4. Coordinate and integrate Promote and support integrated water resource management.

Objectives, Targets, and Metrics:

To be included in the San Diego IRWM Plan, all implementation projects must contribute to the attainment of Objective A, Objective B, and at least one other objective.

Objective A: Encourage the development of integrated solutions to address water management issues and conflicts.

Objective <u>AB</u>: Maximize stakeholder/community involvement and stewardship of water resources, emphasizing education and outreach.

Objective B<u>C</u>: Effectively obtain, manage, and assess water resource data and information.</u>

Objective <u>CD</u>: Further scientific and technical foundation of water management.

Objective DE: Develop and maintain a diverse mix of water resources, <u>encouraging their efficient use and</u> <u>development of local water supplies</u>.

Objective EF: Construct, operate, and maintain a reliable infrastructure system.

Objective F<u>G</u>: Enhance natural hydrologic processes to reduce the effects of hydromodification and encourage integrated flood managementReduce the negative effects on waterways and watershed health caused by hydromodification and flooding.

Objective GH: Effectively reduce sources of pollutants and environmental stressors to protect and enhance human health and safety and the environment.

Objective HI: Protect, restore, and maintain habitat and open space.

Objective LJ: Optimize water-based recreational opportunities.

Objective JK: Effectively address climate change through adaptation or mitigation in water resource management.
